How does the visual content look on the screen - computer vs. live meeting vs. conference big screen?

Can we see colors and contrast? Are you using accessibility effective practices?

## **Is your presentation shareable?**

Check settings for sharing

Will all your materials during the presentation be available on the presentation or other document?

## **Is your presentation engaging?**

Find your style

Bullet points, graphics vs. words, images/videos/audio

Test it out on your own screen and with a friend

Enjoy!

If you can't get
